

GlobeBudget

Product Requirements Document (PRD)

1. Product Overview

Product Name: GlobeBudget

Product Type: FinTech Mobile Application

Product Vision:

To help international students effectively manage expenses, budgets, savings, and multiple currencies through a simple and intuitive financial management platform.

Problem Statement:

International students face difficulties in tracking expenses, managing multiple currencies, maintaining budgets, and understanding spending patterns while studying abroad.

Proposed Solution:

GlobeBudget provides a centralized platform for expense tracking, budget planning, spending analytics, emergency fund monitoring, and currency conversion.

2. Target Audience

Primary Users:

- International Students

Secondary Users:

- Exchange Students
- Students on Scholarships
- Students Working Part-Time

3. User Personas

Persona 1: Aarav Sharma

Age: 22

Location: Berlin, Germany

Goals:

- Stay within budget
- Track expenses
- Build emergency savings

Pain Points:

- Currency conversion confusion
- Overspending
- Lack of financial visibility

Persona 2: Emma Wilson

Age: 24

Location: London, UK

Goals:

- Improve saving habits
- Monitor spending

Pain Points:

- Unorganized expense tracking
- No budgeting strategy

4. User Stories

US-01

As an international student,
I want to record my daily expenses,
so that I can track where my money is being spent.

US-02

As a student,
I want to set monthly budgets,
so that I can avoid overspending.

US-03

As a student studying abroad,
I want to convert currencies,
so that I can understand my spending in my home currency.

US-04

As a student,
I want spending analytics,
so that I can identify unnecessary expenses.

US-05

As a student,
I want to create an emergency savings goal,
so that I can prepare for unexpected situations.

US-06

As a student,
I want to view my expense history,
so that I can analyze my spending behavior.

5. Functional Requirements

FR-01

The system shall allow users to register and login.

FR-02

The system shall allow users to add expenses.

FR-03

The system shall allow users to edit expenses.

FR-04

The system shall allow users to delete expenses.

FR-05

The system shall categorize expenses.

FR-06

The system shall allow users to create monthly budgets.

FR-07

The system shall provide spending analytics.

FR-08

The system shall provide currency conversion.

FR-09

The system shall allow users to set emergency fund goals.

FR-10

The system shall display expense history.

6. Non-Functional Requirements

Performance:

The application should load within 2 seconds.

Security:

User information and financial data should be stored securely.

Usability:

The application should be simple and easy to navigate.

Accessibility:

The application should support users with different accessibility needs.

Responsiveness:

The application should work across various mobile screen sizes.

Availability:

The application should maintain high uptime and reliability.

7. MVP Features

Must Have:

- User Authentication
- Dashboard
- Add Expense
- Expense History
- Budget Management
- Currency Converter

Should Have:

- Emergency Fund Tracker
- Spending Analytics

Could Have:

- AI Financial Coach
- Smart Budget Recommendations
- Spending Forecasts

Won't Have:

- Bank Account Integration
- Investment Tracking

8. Success Metrics

North Star Metric:

Budget Adherence Rate

Supporting Metrics:

- Daily Active Users (DAU)
- Monthly Active Users (MAU)
- Number of Expenses Logged Per User
- Budget Completion Rate
- Emergency Fund Growth Rate
- User Retention Rate
- Average Session Duration

9. Product Roadmap

Phase 1 (MVP)

- Authentication
- Dashboard
- Add Expense
- Expense History
- Budget Tracking

Phase 2

- Currency Converter
- Emergency Fund Tracker
- Spending Analytics

Phase 3

- AI Financial Coach
- Spending Predictions

- Smart Alerts
- Personalized Financial Insights

10. Risks and Challenges

- Users may not consistently log expenses.
- Currency exchange rates may fluctuate frequently.
- Financial data requires strong security and privacy measures.
- User retention may decrease if data entry becomes tedious.
- Students from different countries may have varying budgeting habits.

11. Future Enhancements

- AI-powered financial assistant
- Automated expense categorization
- OCR-based receipt scanning
- Bank account integration
- Investment tracking
- Scholarship and tuition planning
- Financial health scoring system

12. Competitive Analysis

Feature	GlobeBudget	Splitwise	YNAB	Mint
Expense Tracking	✓	✓	✓	✓
Budget Planning	✓	✗	✓	✓
Currency Conversion	✓	✗	✗	✗
Emergency Fund Tracking	✓	✗	✗	✗
Student-Focused	✓	✗	✗	✗
AI Financial Insight	Future	✗	✗	Limited

13. Assumptions

Examples:

- Users own smartphones.
- Users are willing to manually log expenses.
- Users want to improve budgeting habits.
- Exchange rate data is available through APIs.

14. Success Criteria

Example:

Project Success Criteria

- Users can add an expense in less than 10 seconds.
- Users can view spending analytics instantly.
- Users can track monthly budgets effectively.
- Users can understand spending patterns through visual dashboards.
